

Decentralized Project On Binance Smart Chain

DISCLAIMERS

Any purchase or use of services from MATICC creates a binding arbitration agreement between Matic Cash and the user/purchaser as the Terms are

outlined.

This Whitepaper does not constitute an offer or invitation, or any other sale or purchase of shares, securities, or any of the assets. Any possession of MATICC shall not grant any rights in any form to the user, including but not limited to any rights of ownership, interest, profit, redemption, property or intellectual property, decision making, or any other such rights, such as any rights of financial or legal nature, in Matic Cash the corporation or its affiliates. MATICC may be used for protocol and ecosystem governance which has no bearing to the corporation or its affiliates

Blockchain technology has been increasingly adopted in recent years and will certainly be ubiquitous in the near future. It is the ideal for a future-oriented project like Matic Cash (MATICC)

Matic Cash (MATICC) is a peer-to-peer Internet currency that enables instant, near-zero cost payments to anyone in the world. MATICC is an open source, global payment network that is fully decentralized without any central authorities. Mathematics secures the network and empowers individuals to control their own finances. Matic Cash (MATICC) features faster transaction confirmation times and improved storage efficiency than the leading math-based currency. With substantial industry support, trade volume and liquidity, Matic Cash (MATICC) is a proven medium of commerce complementary to Bitcoin.

INTRODUCTION

Matic Cash (MATICC) is a peer-to-peer Internet currency that enables instant, near-zero cost payments to anyone in the world. Matic Cash (MATICC) is a decentralized finance currency on the binance smart chain. MATICC will be the first future digital shopping currency for worldwide

Smart contracts are a kind of application with tamperproof context which are

deployed and executed on blockchain networks. It means that no party (and even creators) are able to manipulate the codes and functions after deployment. Thus, unlike traditional paper contracts or digital ones which are programmed on centralized platforms that are exposed to alteration, termination and deletion by a trusted party or a third person, smart contracts bring parties into agreement and generate a novel and powerful class of trust without relying on trust in any party or intermediaries. This feature turns smart contracts into a superior tool for realizing and implementing digital agreements

Smart contracts are trying to digitalize real-world agreements. Consequently, in order to carry out such a task, they need to access real-world data. However, due to special underlying consensus protocols, blockchains are avoided to connect external data sources, therefore they cannot access outside. Thus, smart contract developers encounter a connectivity issue according to which majority of smart contracts are not able to function practically. Without connectivity, smart contracts and blockchains are only tools and platforms, respectively by which tokenization of shares and assets of organizations are possible and they are not flexible enough to be used as a programming ecosystem

The technology of MATICC Will be leverages blockchain and smart contracts, thus eliminating the complexity and confusion of existing ad serving networks. The network is regulated by the users and the users only.

WHAT IS THE MOTIVE OF MATIC CASH?

In the current scenario it is not an easy task to shopping outside the country because of payment issues or a very high fee. Matic Cash will develop a payment gateway that will work around the world with no fee ecosystem. As we all know blockchain technology is now adopted by almost every industry so why not the shopping industry use it to make payment system easy. We will provide a payment gateway that will be supported by all shopping websites around the world and a shopper can use it to pay anytime anywhere in the world.

HOW MATIC CASH WILL SOLVE INTERNATIONAL PAYMENT ISSUE?

With the increase in globalization, international trade companies have found it easier to expand into new markets. Innovations in communication and transportation have paved the way for globalisation, yet many companies struggle with a fundamental aspect of business: the exchange of money for goods and services. Below are some issues we commonly see importers and exporters face when dealing with international payments:

1. HIDDEN FEES

Trade companies are paying far more than they should to receive their own payments. Businesses can incur flat fees on incoming wire transfers, which can be a 5% - 10% fee assessed on receiving the wire. Moreover, intermediary banks are sometimes in the middle of a transaction and charge their own additional wiring fee.

2. EXCHANGE RATES

Exchange rates affect both the importer trying to pay for goods, and the exporter trying to collect on the goods. Banks charge a premium on foreign exchange, which is often a large margin above the mid-market exchange rate.

3. PAYMENT TRACKING

International payments unfortunately don't have the tracking abilities of carrier services. Importers have no insight into if or when their payments have been delivered into the exporter's bank account, and the exporter has no view into the status of the payments.

4. PAYMENT IDENTIFICATION

Exporters' Accounts Receivable departments spend time and resources identifying and reconciling wire transfers, as it is often difficult to identify any payer information on a deposit.

5. IMPORTERS CAN'T EASILY PAY

Importers are often constrained to making payments via wire transfer, and are unable to utilize more modern payment methods, such as credit/debit card, or e-wallet methods.

Matic Cash has a solution of all above problems as we mentioned above blockchain technology is one of the best technology in terms of low fee, security, and transparency. Matic Cash will provide a payment gateway that will solve all international payment issues. Everyone can will be able to shop internationally without having credit cards.

WHY BINANCE SMART CHAIN (BSC)?

It's simple! The high demand for the DeFi services on the Ethereum network is producing massive demand for the use of the network. This massive demand eventually translates into very high transaction fees. This makes Ethereum an unusable platform for typical day-to-day transactions. Furthermore, Ethereum is only capable of processing 25-30 transactions per second. This is not fast enough to handle periods of high volume. Ethereum transactions may take much longer than expected because miners have an incentive to include transactions with higher fees first. This makes it incredibly hard to create a scalable product that can be used by millions of users on the Ethereum platform.

Binance Smart Chain has much better speed and much lower transaction fees than the Ethereum network. The Binance Smart Chain is gaining a competitive advantage and liquidity. In the foreseeable future, the BSC will become one of the most popular blockchains of the decentralized economy.

KEY BENEFITS OF MATIC CASH

BETTER THAN A CREDIT CARD

With lower transaction fees than any credit card, better exchange rates than any government backed currency, and faster transaction confirmations than other digital payments, Matic Cash is the Decentralized Finance currency On Binance Smart Chain.

BETTER THAN CASH

Matic Cash is a global currency that you can use to purchase products from any country and have them shipped to your doorstep, anywhere in the world. It all costs less than a penny per transaction and no currency exchange is required.

BETTER THAN FIAT

With traditional government-backed currency, it can be difficult to protect your money from theft and inflation. Matic Cash is a Decentralized Finance currency On Binance Smart Chain, the most widely-used and most secure cryptocurrency.

Unlike fiat currency, Matic Cash has a limited supply to make sure inflation is kept under control.

As We All Know People have been making transactions. Currency has evolved over the years in the form of shells, beads, jewellery, coins, and most recently, fiat money. Fiat money is what most people nowadays are used to. It offers significant benefits over its predecessor in terms of being relatively easy to transport and easily measurable.

Cryptocurrency solves these problems: it is based on a decentralized blockchain which keeps inflation under control by design; it can be easily accessed from any location; each transaction is verified by multiple computers around the world; and each wallet is guarded by a highly secure private key. By addressing head on the flaws of fiat money, cryptocurrency is emerging as the next phase in the evolution of money.

The transactions are verified by multiple computers around the world (known as miners) with a cryptographic signature. Once the transaction is confirmed, it is added as a new block to the blockchain. With MATICC, each transaction and wallet balance is kept fully anonymous. Almost instantly, the funds will appear in digital wallet.

Matic Cash uses blockchain and cryptocurrency technology to provide the world's unbanked and underserved people with a currency they can access, trust, and use. We believe in a world where everyone has equal opportunity to build wealth. Yet there are 1.7 billion people who are repressed from owning a bank account. As a fast, secure digital currency, Matic Cash aims to free the trapped capital, intellect, and creativity of the world's emerging population. With Matic Cash, you have access to a currency that is

convenient and secure to use no matter where you live.

MATIC CASH (MATICC) ADOPTION

In order for cryptocurrency financial systems to go “mainstream” we need to capture a larger audience. Matic Cash (MATICC) will target the reach of a user base of 10M and beyond to continue to drive adoption. We will try to list Matic Cash on some major exchanges to reach the target audience.

MATIC CASH ECOSYSTEM

Matic Cash Is Building tools so that a user does not have to leave a platform is a key mission Matic Cash Team. We will be launching products to complement all the needs within the cryptocurrency markets as per the requirements of our audience.

OUR PLATFORM'S VISION

Matic Cash will allow people around the world to pay for services and products in a very convenience manner. Blockchain fee on Binance smartchain is very low it will be a smart choice to use Matic Cash instead of Fiat currencies or bitcoin. Matic Cash is a global currency that you can use to purchase products from any country and have them shipped to your doorstep, anywhere in the world. It all costs less than a penny per transaction and no currency exchange is required.

Faster, Cheaper, Anywhere, Anytime is the reality.

COMMUNITY AND COOPERATION

As an experienced team of crypto supporters, who are passionate about possibilities that DeFi ecosystem presents, we value transparency and fairness. This manifests with the vibrant and active community, that is informed at all times about the progress, achievements and challenges.

Our goal is to build a comprehensive platform that enables our users to utilize the automated strategies, pools and other yield opportunities without a burden of manual decisions and actions.

TOKENONOMIC

✓TOKEN INFORMATION

- Token Name : MATIC CASH
- Token Symbol : MATICC
- Token Decimals : 18
- Token Contract Address : 0x98818BF03b70A582f27a568e7272d059485dfa10
- Initial Supply : 230000000
- Total Supply : 500000000
- Network : BEP20
- Blockchain : Binance Smart Chain (BSC)
- Explorers :
<https://bscscan.com/token/0x98818BF03b70A582f27a568e7272d059485dfa10>

▮ TOKEN ALLOCATION

- ▮ **PRODUCT DEVELOPMENT - 22%**
- ▮ **IDO & PRIVATE SALE - 25%**
- ▮ **BOUNTY AND LOYALTY PROGRAM - 21%**
- ▮ **MARKETING AND PARTNERSHIPS - 15%**
- ▮ **TEAM AND ADVISOR 17%**

▮ **TOKEN BURN MECHANISM**

All remaining tokens from the IDO and Private sales will be burned after sale ends. Tokens equivalent to 10% of the total transaction fee calculated on the monthly basis will be burned at the end of the month.

▮ **ROADMAP**

Due to complexity of the system and use cases, providing a prioritized roadmap with exact details is impossible; however general purposes are provided as following:

- Q1 2020
 - ✓ Idea And Concept Development Of Matic Cash P2P Crypto Marketplace
- Q2 2021
 - ✓ Market Research For The Project Started
- Q3 2021
 - ✓ Begin Social Marketing
 - ✓ Pre-Launch Notifications

➤ Q4 2021

- ✓ Public Pre-Sale Phase 1
- ✓ IDO, Private Sale & Exchange Listing
- ✓ Pre sale in PINK SALE

➤ Q5 2022

- ✓ Launch V2.0 of Website
- ✓ Launch to BSC MainNet
- ✓ PancakeSwap Listing
- ✓ CoinMarketCap Listing
- ✓ CoinGecko Listing
- ✓ 10000 MATICC Token Holders

➤ Q6 2022

- ✓ Exploring exchanges (Bitmart, Hotbit, whiteBit etc)
- ✓ Partner with Global Charities
- ✓ 50000 MATICC Token Holders
- ✓ Double Team Size

➤ 2022 - 2025

- ✓ Increase Team Size by 50%
- ✓ MATICC Token Office
- ✓ Further Online Partnerships
- ✓ Exploring larger exchanges (Binance, Kraken etc)
- ✓ 500,000+ MATICC Token Holders
- ✓ Wide Marketing And Expansion Of Matic Cash Network
